

DRIVE BELT CONSTRUCTION [ZJ, Z6]

B3E011015800T01

- A serpentine-type drive belt with a V-ribbed belt to drive the supplemental units has been adopted. This shortens the engine length and improves serviceability.
- A drive belt auto tensioner with an embedded coil spring has been adopted to automatically maintain optimal drive belt tension.

1	P/S oil pump pulley
2	Idler pulley
3	Drive belt
4	Generator pulley
5	Water pump pulley
6	A/C compressor pulley
7	Crankshaft pulley
8	Auto tensioner pulley
