

ENGINE MOUNT OUTLINE [ZJ, Z6]

B3E011039000T01

- The pendulum-type layout of the engine mounting reduces noise in the cabin.
- The engine is supported at three points, and simplification of engine mount components has been attained.
- An oil-filled No.3 engine mount rubber has been adopted to reduce noise and vibration in the cabin.
- The surface of the No.3 engine mount is made of aluminum alloy to decrease weight.
