

## SPARK PLUG CONSTRUCTION [LF]

B3E011801008T07

### Structure

- An iridium spark plug with excellent durability and firing performance has been adopted.
- The extremely thin, center electrode has a diameter of 0.6 mm {0.024 in} and is made of iridium alloy.
- Durability has been improved by the use of a platinum-tipped grounding electrode.
- Based on the thinner electrode (center electrode), electric discharge has been reduced and ignition has been improved, resulting in stable ignition performance under any driving conditions.

1	Iridium alloy
2	Platinum-tip
3	Center electrode
