

# CONTROLLER AREA NETWORK (CAN) OUTLINE

---

B3E041543000T05

• The DSC HU/CM sends and receives data to and from other modules via the CAN system. Refer to Section 09 for a detailed explanation of the CAN. (See [CONTROLLER AREA NETWORK \(CAN\) SYSTEM OUTLINE](#).)

## Data sent

- Brake system condition
- Wheel speeds of all four wheels
- Brake system warning light illumination request
- ABS warning light illumination request
- DSC indicator light illumination request
- DSC OFF light illumination request
- Torque reduction request

## Data received

- Engine speed
- Gear/selector lever position
- Engine torque
- Throttle valve opening angle
- Brake pedal position
- Transaxle type
- Transaxle status
- Engine specifications
- Tire size
- Vehicle specification
