

SIMULATION FUNCTION [FN4A-EL]

B3E050219090T08

- By using the WDS or equivalent, simulation items for input/output parts preset in the PCM can be optionally selected and operated regardless of PCM control conditions.

Simulation Item Table

X: Available

Simulation item	Applicable component	Unit/Condition	Operation		PCM terminal
			IG ON	Idle	
LPS	Pressure control solenoid control signal in PCM	%		X	X
SSA/SS1	Shift solenoid A control signal in PCM	%		X	X
SSB/SS2	Shift solenoid B control signal in PCM	%		X	X
SSC/SS3	Shift solenoid C control signal in PCM	%		X	X
SSD/ SS4	Shift solenoid D control signal in PCM	On/Off		X	X
SSE_ SS5	Shift solenoid E control signal in PCM	On/Off		X	X
