

LATCH AND LOCK ACTUATOR CONSTRUCTION

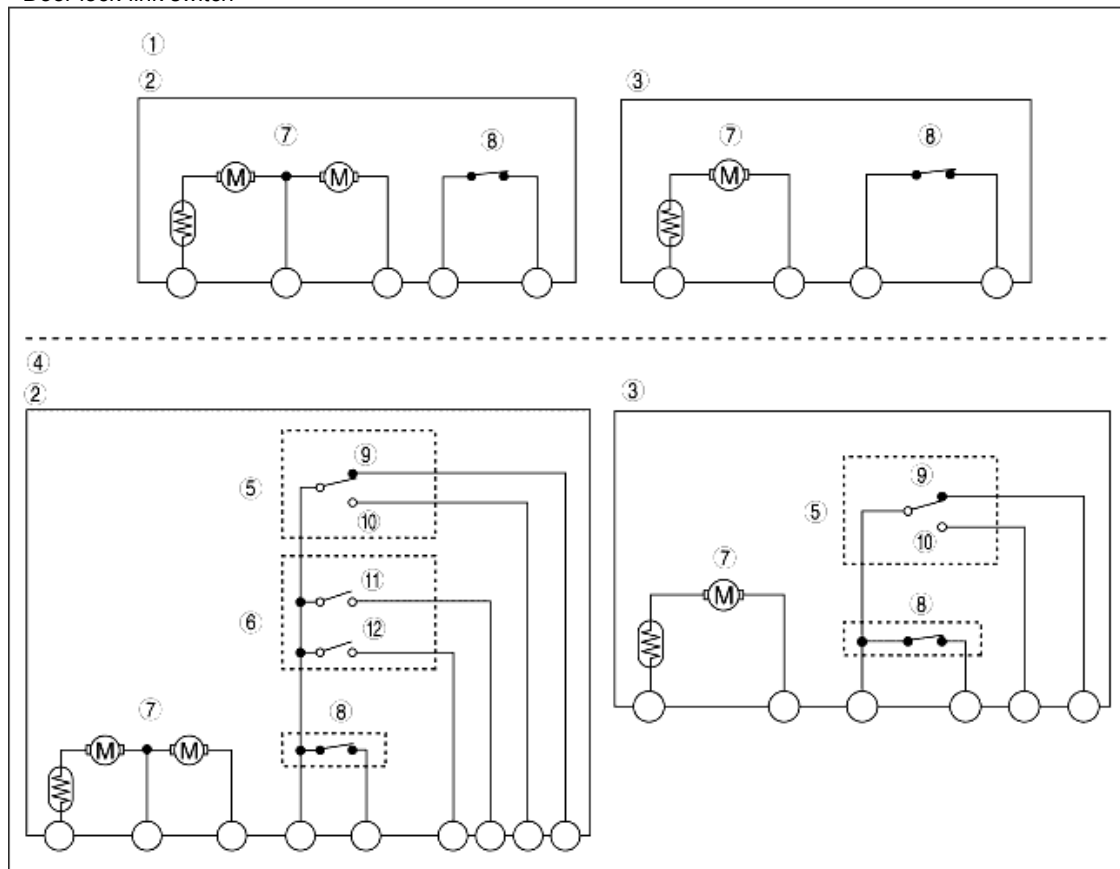

B3E091401090T05

- The following parts are built into the latch and lock actuators of each door and liftgate:

- A latch switch that turns on/off with the opening/closing of the door or liftgate.
 - When the door or liftgate is open, the latch switch is on.
 - When the door or liftgate is closed, the latch switch is off.
- A lock actuator that latches/unlatches the latch.

- The following parts are built into the lock and latch actuator of the driver-side door:

- Door key cylinder switch
- Door lock-link switch

B3E0914T010

1	Door latch switch (door open or closed)
2	Double locking system
3	Except double locking system
4	Driver's side
5	Front door lock-link switch
6	Front door key cylinder switch
7	Lock actuator
8	Latch switch
9	Unlock
10	Lock
11	Unlock (reset)
12	Lock (set)
