

# REAR COMBINATION LIGHT CONSTRUCTION

B3E091801052T18

- A step reflector that diffuses and reflects the light of the rear combination light bulbs, has been adopted. A flat, uncut lens has been adopted to control illumination distribution.
- A round reflector for the rear combination lights has been adopted to improve design.
- LEDs have been adopted for the stop/taillights, resulting in a reduction of energy consumption. (5HB)
