

FRONT COMBINATION LIGHT CONSTRUCTION

B3E091851060T01

- A headlight with built-in front turn light and parking light has been adopted for design improvement.
- Projector type headlights have been adopted, and these have been incorporated, along with the front turn light and the parking light, into a single unit to reduce size.
- Discharge headlights, with a wide illumination area and projection of white light with a hue similar to sunlight, have been adopted.

Projector-type Headlight

- Light emitted from the first focal point is projected off the reflector, gathered at the second focal point, and output through the convex lens.
