

# ENTERTAINMENT OUTLINE

---

B3E092001066T01

- A center panel module, composed of the installed audio unit and the audio switches built into the center panel, has been adopted.
- The audio unit consists of the following parts:
  - Base unit, which has AM/FM tuner and control functions for each module
  - Upper module (CD player or CD changer)
  - Lower module (cassette deck or MD player)
  - Cover
- The upper module (CD player or CD changer) and lower module (cassette deck or MD player) are optional accessories.
- Module availability depends on vehicle grade.
- An audio control switch is equipped on the steering wheel for audio operation.
- A center roof antenna has been adopted.
- The following speakers have been adopted for standard specification vehicles (6 speakers):
  - Front door speaker
  - Rear door speaker
  - Front tweeter
- A condenser has been installed on the high-mount brake light for improved noise reduction. (5HB)
- All information related to the audio system is displayed on the information display's LCD.
