

CAR-NAVIGATION SYSTEM OUTLINE

B3E092066000T01

- A 7 inch wide, pop-up LCD (*TFT) has been adopted to improve marketability.
- A hybrid in car-navigation system and map-matching function has been adopted to improve accuracy of vehicle position.
- A remote control with an infrared transmitter has been adopted to improve operational ability.
- The languages and voices available for use with the car-navigation unit include English, French, German, Dutch, Spanish, and Italian. However, the language used in this manual is in **English only**.

*TFT : Thin Film Transistor
